

# Sustavov Anton

## ***Contacts:***

Kyiv, Ukraine  
phone: +390 98 819 6165  
e-mail: sustav86@gmail.com  
skype: sustavovanton  
GitHub: github.com/sustav86/

***Objective:***            **Junior Data Scientist**

***Technical skills:***    **Version control:** Git, SVN  
                              **DB:** PostgreSQL, MS SQL  
                              **Language:** Python, Java, JS  
                              **Frameworks:**  
                              **Python:**  
                                  • Django  
                              **Tools:** Jupyter Notebook  
                              **Cloud-Based Technologies:** GCP, Docker  
                              **OS:** Ubuntu

***Work Experience:***        • **Data Scientist pet projects**  
                                  > Project “who wanna to be a millionaire”  
                                  Working process:  
                                      - clean dataset  
                                      - grouping and analyzing dataset  
                                  > Exploratory data analysis  
                                  Working process:  
                                      - cleaning and analyzing dataset  
                                      - testing hypothesis (p-value)  
                                      - correlation analysis dataset  
                                  > Taste meal dataset analysis  
                                  Working process:  
                                      - cleaning and analyzing dataset  
                                      - testing hypothesis (p-value)  
                                      - correlation analysis dataset  
                                      - feature engineering  
                                      - ML regression model

***Additional Education:***        • **Data Science (skillfactory.ru/)**  
                                  Stack of technologies: Python 3, Jupyter

***Education:***                • **Krivoy Rog National University**  
                                  Master. The automated electric drive.  
                                  Software of automated systems.

***Interests:***                Algorithms, Architectural patterns, Books, Mathematics, AI (ML)

***Languages:***              Ukrainian (native), English (intermediate), Russian (native)

***Books:***                    Python in Action, Linear algebra etc.
